

Nhan Do

Name of Website

- PokeMart

Description of Topic

- This Website is going to be created as a personal business website where I am able to sell Pokemon cards and products. It is going to have a navigation system where users are able to see information from the about us, contact, home page, and product page. The website is going to have a product section where it is linked to multiple pages categorized for the type of product they are wanting to buy. Website is also going to have a login system that allows users to login and have their own personal profile. Another feature the website will have is that in the contact page, users are about to write a message within the website for customer support.

Page Names

- Home
- About Us
